Dhaka, Bangladesh.

ACKNOWLEDGMENT

First of all, we wish to express our gratitude to the Almighty for giving us the strength to perform our responsibilities and complete the report.

Our deep gratitude goes first to our faculty advisor Dr. Dihan Md. Nuruddin Hasan, who expertly guided us in our senior design project throughout the whole CSE499A and CSE499B. Sir had discussions with us regarding our project on a regular basis. His guidance helped us in all type of research, writings and completing the project.

Also, our gratefulness is divine to the North South University, ECE department for providing us a course such as CSE 499 in which we could really work on this project and materialize it the way we have dreamt of. This course is very helpful to bridge the gap between the theoretical knowledge and real life experience as part of the Bachelor of Science (BS) program. This report has been designed to have a practical experience through the theoretical understanding.

Abstract

Portfolios of late are progressively computerized instead of physical. E-portfolios give an opportunity to showcase works, to consider work exercises, to help learning and to fill in as a instrument for assessment. To reach more customers on a worldwide scale, portfolios are second to no other medium. In order to build an indigenous solution in this regard, we have created an Online Portfolio Maker, a platform that's services range from fresh graduates looking to land a job to experienced workers trying to earn more. Our online solution does not only ensures better look and feel but also warrants better results in attracting new opportunities.
