Acknowledgment

By the kindness of the Almighty, we have successfully completed our senior design project entitled “CAR’S CLINIC- Online Automotive Part's Shop and Emergency Car Service Center”. Our deep gratitude goes first to my faculty advisor Dr. Dihan MD. Nuruddin Hasan, who expertly guided us in our senior design project report throughout the EEE/CSE-499B. His guidance helped us in all type writings and completing the project report of EEE/CSE-499B. Our sincere thanks also go to North South University, Dhaka, Bangladesh for giving us such a platform where we can have an industrial level experience as a part of our academics. Last but not least, we would like to thank our family as their inspiration and guidance kept us focused and motivated.

Abstract

Car Clinic - Online Automotive Parts Shop and Emergency Car Service Center is an auto car parts store that serves customers on a web-based basis. It is currently providing services in some commercial areas of Dhaka as car parts are very expensive in these places. So this website is providing quality products at very low prices, including emergency service through GPS tracking. In view of the significance of improvement and redesigning of the vehicle parts industry, the report breaks down the area of the automobile parts industry. To accomplish further turn of events and updates, five components affecting many car parts industry redesigns are advanced subsequently in this report. They are market demands, resource supply, innovation level, system and policy, and international trade. An experimental investigation is made by multivariate factual relapse strategies and affirms the aftereffect of subjective examination above and afterward gets the quantitative end.
