

ABSTRACT

Job finding website DriverHub

The rapid development of internet and smart phone technology has led to the increased popularity of dynamic website used to organize a easy life for us. Driver hub is a web application which will make our life easier and more comfortable specially for vehicle owner and driver. We want to set reliable communication between a vehicles owner and a driver without any third party for driving vacancy for driver who looking for a job and a vehicle owner who needs a driver for his/her vehicle or rent his vehicle but he/she has no option but need to hire a driver. Through our website any sort of vehicle driver can apply for a job and any vehicles owner can post who's looking for a driver. As a result, one can easily find drivers for their vehicles. this website will help them finding each other and make a bridge between them. online payment method and driver rating system will make a dynamic and secure website. this website will be user friendly so that everybody gets beneficial by using the website.
