

NSU hosts talk on AI

North South University
Centre for Legal Research
(NSU CLR), in collaboration
with the Department of Law,
hosted a talk titled "Artificial
Intelligence and the

Emerging Global Order:
Opportunities, Risks, and the
Future of Governance" on the
university campus in the city
on Monday, says a statement.
The session brought together
faculty members, researchers
and students to examine the
opportunities, risks and gov-
ernance challenges posed by
artificial intelligence (AI) in
today's global landscape.

The programme began with
opening remarks by Professor
Ishtiaque Ahmed, Chair of the
Department of Law, who wel-
comed the attendees and
reflected on the far-reaching
impact of AI on legal research
and practice.

In his keynote address,
Professor Oliver Roberts, Co-
Director of the WashU Law AI
Collaborative and Adjunct
Professor of Law at
Washington University
School of Law, examined how
AI is reshaping legal policy
and the day-to-day practice
of law. Drawing on his experi-
ence as both an academic and
a practicing attorney in the
United States, he noted the
growing-and at times prob-
lematic-reliance on AI tools
among lawyers.
