

Abstract

TutorYouNSU.com is the first online peer-to-peer tutoring platform designed to help NSU students connect with NSU Tutors. It will help NSU students connect with NSU Tutors directly. Students will be able to get both online tutoring and in-person tutoring. It will help students get better grades and make their courses easier. As an NSU student, they will have access to our high quality NSU Tutors for their particular course. They will also have online access to all resources and course files that can be updated in real-time by faculties, so that students will always have the latest file. The aim of TutorYouNSU is to make it easier to help connect students who needed help in a certain course with students who had already completed that course. All tutors have completed the course (under a particular faculty) they will tutor. They know exactly what to expect and how to do well on that particular course. Each tutor has their preferred tutoring times on their own page. Tutoring everywhere has been increasing each day. Moreover, it has been shown to very useful for students. There will also be video tutorials on our website for each course. TutorYouNSU will also have other educational tools and features such as the ability to download a GPA calculator, get an unofficial grade sheet via online, and do their course analysis online by themselves from home. That will save the students a considerable amount of time, so that they can concentrate on their education instead. It will also ease pressure off the university authority who will have a lower number of students go to them to solve their problems, since now many problems can and will be solved by the students themselves.
